

# Relax & Enjoy Simple Solutions

## Efficient Watering

Use water wisely by watering according to plant need and get the right amount of water.

## Trust Your Lawn To The Weather

## Easy Installation

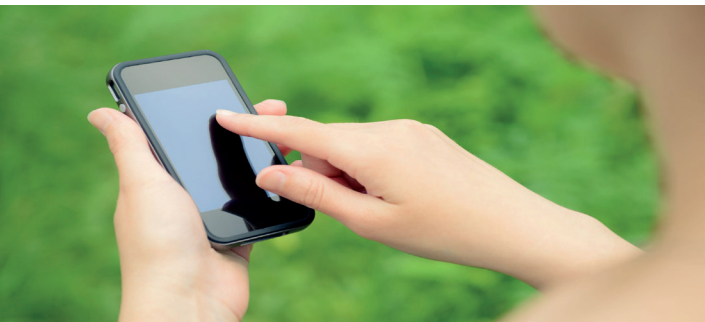

Can be installed in less than an hour by licensed professionals or let us walk you through installing Controller Link yourself.

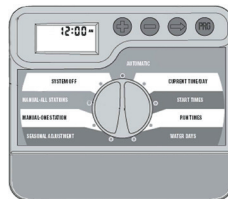

"Do you mean I never need to program my sprinkler controller again?"

## Get the Latest in Innovative Technology

**Connects** to your current sprinkler timer.

Controller Link is a simple upgrade for existing sprinkler timers to provide weather based watering. Controller Link saves water by managing watering based on real-time weather conditions. Controller Link retrieves five weather measurements each hour from the Internet

Climate conditions cause water to evaporate from the landscape. On hot, dry, windy days plants need more water. On cool cloudy days watering may not be needed.

## Remote Management

Manage your sprinkler system from any Smart Phone, Tablet, or Computer that is connected to the Internet.

## Flow Sensing

Track real-time water use and get an E-mail alert when a pipe breaks or low flow is sensed.

## Measure Rain

Don't just sense when it's raining, measure the amount of rain. Never worry about watering in the rain again.

## Healthy Landscapes

Plants thrive with deep, less frequent watering, sustaining a healthy balance of air and water.

## Commercial or Residential

To know when to water, Controller Link combines site specific settings, real-time ET, and rainfall to then manage your sprinkler system for optimal moisture levels.
